AAMIR SALEEM

AWS & GCP Certified Cloud / DevOps Engineer

Faisalabad, Pakistan | aamirsaleem5255@gmail.com | +92 333 455 4949 | LinkedIn

Open to Remote Opportunities Worldwide — Flexible with US / EU / AU Time Zones

PROFESSIONAL SUMMARY

AWS & GCP Certified Cloud and DevOps Engineer with 5+ years of experience designing, securing, and automating cloud-native infrastructure. Skilled in Infrastructure as Code, CI/CD automation, container workflows, and network security (WAF, VPN, firewalls). Track record of cutting deployment time, reducing cloud spend, and maintaining 99.9% uptime for production systems across multiple client environments. Seeking a remote-first Cloud/DevOps role contributing to a global engineering team.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services Training and Certification

View Credential / Badge →

IN PROGRESS

AWS Certified SysOps Administrator – Associate

Amazon Web Services — Preparation in progress

TECHNICAL SKILLS

- **AWS:** EC2, S3, RDS, Lambda, CloudFront, Route 53, SES, SNS, SQS, ECS, Fargate
- **GCP:** Compute Engine, Cloud Storage, VM provisioning & deployment, Load Balancing
- **AWS Security:** IAM, WAF, Shield, KMS, Secrets Manager, Certificate Manager (ACM)
- **IaC & Automation:** Terraform, AWS CloudFormation, AWS CLI, Bash Scripting
- **DevOps & CI/CD:** Docker, GitHub Actions, AWS CodePipeline, Jenkins (basic), Laravel Forge
- **Monitoring:** CloudWatch, CloudTrail, AWS Config, Grafana (basic)
- **Networking:** VPC, Subnets, Route Tables, NAT Gateway, VPN, pfSense Firewall, Switching, Routing
- **Security & Pentesting:** Penetration Testing, OWASP Top 10, Nmap, Burp Suite, SSL/TLS, Vulnerability Assessment
- **Linux Server Administration:** Ubuntu, CentOS — self-managed bare-metal server setup replicating cloud-style provisioning (SSH hardening, FTP, DNS, firewall rules, uptime monitoring), Shell Scripting, Cron, Performance Tuning
- **Databases:** AWS RDS, MySQL, PostgreSQL, Backup & Recovery, Query Optimization
- **Soft Skills:** Remote Collaboration, Technical Documentation, Problem Solving, Agile/Scrum

WORK EXPERIENCE

AWS & GCP Cloud / DevOps Engineer Oct 2021 – Present (5 Years)

Xelent Solution — Faisalabad, Pakistan

- Architected and deployed secure, highly available AWS environments using Multi-AZ, Auto Scaling Groups, and Elastic Load Balancers, achieving 99.9% uptime across production workloads for 6+ client applications.
- Provisioned, deployed, and managed production and staging workloads on Google Cloud Platform (Compute Engine VMs and Cloud Storage), handling instance sizing, networking, and deployment configuration for backup and evaluation environments.
- Reduced monthly cloud costs by enforcing AWS Cost Explorer / Budgets policies and eliminating idle or underutilized EC2, RDS, and S3 resources.
- Developed and maintained Infrastructure as Code (IaC) using Terraform and AWS CloudFormation, cutting deployment time by 60% and eliminating manual configuration drift.

- Built and managed end-to-end CI/CD pipelines integrating GitHub Actions / CodePipeline with Laravel Forge for zero-downtime deployments across 6+ production applications.
- Secured network perimeters using AWS WAF (geo/IP-based rules), Security Groups, NACLs, and pfSense firewall, reducing unauthorized access attempts and overall attack surface.
- Conducted internal penetration testing on web apps and network infrastructure, identified critical vulnerabilities (SQLi, XSS, misconfigurations), and implemented remediation aligned with OWASP Top 10.
- Configured site-to-site and client VPNs using pfSense and AWS VPN Gateway, enabling secure hybrid-cloud connectivity.
- Implemented centralized monitoring and alerting via AWS CloudWatch, CloudTrail, and AWS Config for proactive incident detection and compliance auditing.
- Deployed and managed AWS RDS (MySQL/PostgreSQL) with automated backups, point-in-time recovery, read replicas, and performance tuning.
- Configured Amazon SES for transactional email delivery and AWS CloudFront CDN for global low-latency content distribution.
- Designed Lambda-based serverless automation workflows, reducing operational toil for event-driven infrastructure tasks.
- Administered Linux servers (Ubuntu/CentOS) including shell scripting, cron jobs, and performance tuning for optimized resource utilization.

KEY PROJECTS

▸ ClaimsBuyOut claimsbuyout.com

Stack: EC2, RDS, CloudFront, ALB, WAF, CloudWatch, Laravel Forge, CI/CD

- Deployed a Laravel claims management system on Multi-AZ RDS behind an Application Load Balancer for high availability.
- Secured with AWS WAF (geo/IP rules) and HTTPS via ACM; CloudFront used for global CDN caching.

▸ ReCar Inventory Platform recarinv.com

Stack: EC2, RDS, CloudFormation, Lambda, CloudWatch, Laravel Forge

- Automated infrastructure provisioning with CloudFormation and built a CI/CD pipeline for zero-downtime deployments.
- Set up CloudWatch alerts with Lambda-based auto-remediation to protect application uptime.

▸ Macropick E-Commerce macropick.com

Stack: EC2, RDS, CloudFront, SES, CloudWatch, Laravel Forge

- Ran a high-availability e-commerce deployment with AWS SES for transactional email and CDN-accelerated delivery.
- Integrated a CI/CD pipeline that reduced deployment time by 50%.

▸ Xelent Solution Corporate Site xelent.pk

Stack: EC2, CloudFront, ALB, Lambda, CloudWatch, Laravel Forge

- Scaled the site with Auto Scaling Groups and CloudFront; used Lambda functions for backend automation.
- Configured advanced caching strategies achieving sub-200ms global response times.

EDUCATION

BS Computer Science — Government College University, Faisalabad

2018 – 2022
